PROFILE

Software Developer with proven experience in building scalable, high-performance systems using Python. Skilled in designing and developing web-based applications, backend services, data pipelines, and APIs, with a focus on clean, maintainable, and optimized code. Experienced in creating reliable software solutions that improve operational efficiency and enable real-time data processing. Highly motivated to contribute to innovative teams, adopt best software engineering practices, and grow into advanced software engineering roles.

WORK EXPERIENCE

A Plus Topper

<i>Python Developer</i> - Designed and developed algorithmic trading platforms using Python and Django, implementing rule-based, price-action, and indicator-driven strategies for equities, futures, and options, supporting both live trading systems and backtesting frameworks. - Engineered scalable ELT data pipelines for high-volume market data processing, ingesting ~5M records/day and maintaining ~5 years of time-series data, enabling fast quantitative research and strategy evaluation. Optimized backtesting modules and automated reporting systems, reducing strategy research cycle time by ~70% and improving decision-making efficiency. - Built a Telegram-based automation gateway (CLI tool) for task orchestration and management, integrating intelligent execution workflows to streamline user operations. - Architected and optimized ClickHouse and PostgreSQL databases for high-throughput analytics and low-latency transaction processing, improving query performance and system scalability. - Developed low-latency RESTful APIs and WebSocket-based real-time data streaming services for order execution systems, live market data delivery, and multi-application integration. - Applied performance optimization techniques to enhance system throughput, reduce latency, and ensure reliability in distributed trading systems.	Dec 2024 – present Hyderabad, India
<i>Python Developer Intern</i> Developed and maintained web applications using the Django framework, focused on delivering efficient, scalable, and user-friendly trading tools. Collaborated on frontend integration with Plotly and JavaScript to create interactive trading charts and dashboards visualizing Bullish, Bearish, and Butterfly options strategies for market analysis. Implemented dynamic data visualization modules for real-time stock and strategy performance tracking, enhancing user experience and analytical capabilities. Gained hands-on experience in full-stack web development, bridging trading concepts with web-based interfaces for better accessibility and decision support.	Jul 2024 – Dec 2024 Hyderabad, India

EDUCATION

Bachelor of Technology (Artificial Intelligence and Data Science) <i>Vishnu Institute of Technology</i> CGPA : 8.86/10.0	2020 – 2024 Bhimavaram, India
--	--

TECHNICAL SKILLS & TOOLS

Python • SQL • Django • Postgresql • Cilckhouse • Java Script • HTML • CSS • GIT

CERTIFICATES

- The Joy of Computing using Python from NPTEL** — Developed a strong foundation in Python programming principles, including data structures, control flow, and functions. | Gained practical experience in applying computational thinking to solve programming problems.
- Sql Certification from Hackerank** — <https://www.hackerrank.com/certificates/fe15031baa5d> | Demonstrated skill in writing and understanding SQL queries for data management and analysis.
- Data Science Bootcamp Certificate from OdinSchool** — Certificate ID : ODIN1002920 | Acquired comprehensive knowledge and practical skills in data analysis, machine learning, and statistical modeling. Gained hands-on experience with Python libraries such as NumPy, Pandas, Scikit-learn, Matplotlib.
